

UNITED STATES BANKRUPTCY COURT
SOUTHERN DISTRICT OF INDIANA

DIGITAL AUDIO FILES NO LONGER AVAILABLE

In March of 2011, the Court first began offering digital audio files of certain hearings as part of the electronic record. Those files could be retrieved through PACER.

Customers may have noticed that the files are not available on the case docket for recent hearings. Software upgrades led to technological issues, and after much exploration of alternatives it was decided that we currently lack the staff time needed to continue placement of the digital files on the dockets.

We expect further software and programming improvements to resolve the problems and allow for a streamlined placement of digital audio files on the docket, at which time staff will resume doing so.

We apologize for any inconvenience. Please remember that those digital audio files were never the official record. The recordings that are the official record have not been affected by this problem with generating digital audio files.
